

GE Oil & Gas

LEADING

PROGRESS

TOGETHER

FLORENCE, JANUARY 30-31  
PALAZZO dei CONGRESSI

2012  
ANNUAL MEETING  
AGENDA

# MONDAY, JANUARY 30

## TOPICS WILL INCLUDE:

- High performance LNG designs
- Leading progress in LNG
- The next decade in deepwater: unlocking resources through innovation
- New production frontiers in new places
- Leading progress in subsea applications
- Revitalizing the North Sea: subsea processing & beyond
- Asset healthcare and asset monitoring
- Leading progress in Measurement & Control
- Post Arab Spring – The future of the Libyan oil and gas industry
- Global Horizons: from Libya to Mozambique

# TUESDAY, JANUARY 31

## TOPICS WILL INCLUDE:

- Unconventionals: working together to develop responsible energy
- Working together to develop solutions for unconventional energy production
- The value of partnerships
- Customer partnerships – an essential element of service
- Panel Discussion: The future of the global energy industry

## CONFIRMED SPEAKERS INCLUDE:

**Sam Aquillano** | VP Drilling & Surface, GE Oil & Gas  
**Rod Christie** | VP Subsea Systems, GE Oil & Gas  
**Neil Duffin** | President, ExxonMobil Development Company  
**Dan Heintzelman** | President and CEO, GE Oil & Gas  
**Prady Iyyanki** | VP Turbomachinery, GE Oil & Gas  
**Kevin Kennelley** | VP Engineering and Technology for GPO, BP  
**Brian Palmer** | VP Measurement & Control, GE Oil & Gas  
**Kurt M. Reinicke** | Professor, Institute of Petroleum Engineering, Clausthal University of Technology Germany  
**Marjan Van Loon** | VP LNG & Gas Processing, Shell Global Solutions  
**Bjørn Kåre Viken** | SVP, Statoil  
**Andrew Way** | VP Global Services, GE Oil & Gas

# Technology Forums

A series of "deep dives", led by global experts from across the business, into the latest technology innovations that are our key enablers of progress. Each session, with the exception of PII Forums, runs twice on Monday, January 30, ahead of the plenary session.

- Addressing the challenges of subsea exploration & production with innovative technology & integrated solutions
- Technology solutions that enable Enhanced Oil Recovery (EOR)
- Technology advances to support production from unconventional sources
- Advances in land & floating LNG production
- Technical advances in Aeroderivative & Heavy Duty gas turbine technology
- Remote and local monitoring & diagnostics solutions for equipment across the oil and gas industry
- Latest compression technology innovations
- Operational Effectiveness: service solutions that improve availability & reduce downtime
- Technology Partnerships: solutions that increase availability & efficiency and reduce emissions
- Pipeline Operators Workshop: enabling integrity decisions with leading edge technology (*Monday morning*)
- Customer Tutorial: pipeline integrity software productivity tools (*Tuesday afternoon*)

# Plant tours

## Go behind the scenes at GE Oil & Gas

Visit one of our facilities to see in person our advanced manufacturing capabilities in action. Follow a compressor or turbine on its way to completion and watch metal transform into cutting-edge technology. Talk to our experts and discover how we constantly increase productivity, sustainability and the overall safety of our plants.

### You can choose between two options:

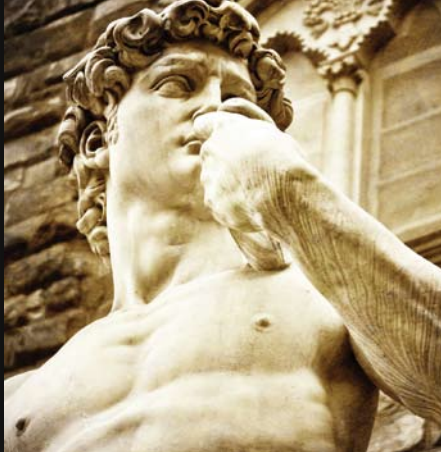

Florence – Spanning 80,000 m<sup>2</sup>, our main technologies at this site are centrifugal and reciprocating compressors, steam and gas turbines and turboexpanders.

In addition to manufacturing, this facility also houses extensive testing capabilities, the iCenter for remote monitoring and diagnostics, and the repair technology shop.

Massa – This 40,000 m<sup>2</sup> facility houses heavy-wall reactors, large compressor machining and assembly, turbocompressor packaging and full-load string testing. Massa also features one of our customer training centers.

Both plant tours run on **Tuesday afternoon, January, 31**. Please sign up for your preferred site and don't miss this opportunity to enter the world of GE Oil & Gas!

# Partners program

We invite your partner or spouse to participate in our popular Partners Program, featuring an exclusive two-day tour of Florence

## MONDAY, JANUARY 30

- Private tour and coffee break at the Accademia Gallery where Michelangelo's famous David sculpture resides
- Lunch at one of Florence's oldest and most beautiful churches, Santo Stefano al Ponte, close to the Ponte Vecchio
- Private tour of the Teatro del Maggio Musicale Fiorentino for a unique look behind the scenes of Florence's most important theatre, followed by a private performance and chance to speak with the musicians

## TUESDAY, JANUARY 31

- Tour of the Gucci Museum, which pays homage to 90 years of fashion design, housed in the 14th century Palazzo della Mercanzia overlooking the Piazza della Signoria
- Tour of the Palazzo Vecchio, a magnificent 14th century fortress and former town hall, located in one of the most magnificent of Florence's squares; it houses celebrated traditional works by artists such as Vasari, Michelozzi and Michelangelo
- Visits will also be made to the Salone del Cinquecento (the Hall of Five Hundred) meeting place of the 500-person council of the republic, and to the private apartments of the Medici family
- Lunch at the Palazzo Borghese, just a short walk from Piazza della Signoria

We recommend early reservation, since space is limited.
